

Americus Fire and Emergency Services

For immediate release.

PUBLIC SERVICE ANNOUNCEMENT

The Americus Fire & Emergency Services will begin annual hydrant testing/flowing on Monday, June 1, and should be finished within 6 weeks. These tests are required to maintain Americus' ISO rating of 1, which affects property insurance rates. They also ensure that the hydrant system is kept in top working order, to keep our citizens safe and to protect property.

If you have discolored water, run your faucets for 10 - 15 minutes. If, after doing this, your water is still cloudy, please call 924-3213.

Thank you!

Harriett Williams
